ABOUT ME

PassionateComputerScience undergraduate specializing in Artificial Intelligence and Data Engineering with a rigorous foundation in Object-Oriented Programming, Data Structures, and Modern Web Architectures. Currently seeking an undergraduate transfer opportunity to an internationally recognized university to pursue advanced coursework, collaborative research, and scalable software engineering. Demonstrated ability in translating computational logic into full-stack and algorithmic solutions through hands-on projects, active competitive programming (100+ problems solved), and continuous technical self-development.

EDUCATION

2025–Present)

JAIN UNIVERSITY

- B.Tech in CSE (AI & Data Engineering)
  Semester: 2 | CGPA: 7.17/ 10.0
  Faculty of Eng. & Tech.,
  Kanakapura

Graduated: 2025

SRI CHAITANYA PU COLLEGE

- Senior Secondary (Class XII) – CBSE
  Aggregate Score: 63.2%

Graduated: 2023

Mount liitera zee School

- SecondaryEducation(Class X) – CBSE
  Aggregate Score: 74%

KEY COURSEWORK

- Data Structures & Algorithms
- Object-Oriented Programming (Java)
- Database Management Systems
- Operating Systems Fundamentals
- Computer System Architecture
- Discrete Mathematics & Logic

CERTIFICATIONS

- **Python for Everybody**
  University of Michigan (Coursera)
- **Responsive Web Design**
  freeCodeCamp VerifiedCertification
- **HTML, CSS & JS for Devs**
  JohnsHopkins Univ.(Coursera)

LEADERSHIP & CLUBS

- **Technical & Coding Club**: Active member participating in coding meetups.
- **Tech Fest Coordinator**: Handled event registration and participant logistics.

LANGUAGES & INFO

- **English** (Fluent / Medium of Instruction)
- **Tamil** (Native Proficiency)
- **Hindi** (Working Proficiency)
- **Nationality**: Indian
- **DOB**: March 13, 2008

TECHNICAL SKILLS

Programming Languages: Python, Java, C, JavaScript (ES6+), SQL

Web Technologies: HTML5,CSS3, Bootstrap 5, React.js (Basics), Node.js

Databases & Tools: MySQL,MongoDB, Git, GitHub, VS Code, Postman

Core Concepts: DataStructures & Algorithms, OOP, DBMS, Operating Systems

PROJECTS

Personal Developer Portfolio Website

Technologies: HTML5, CSS3, JavaScript, GitHub Pages

- Designed and deployed an interactive, mobile-responsive portfolio showcasing technical projects, academic profile, and core competencies with smooth cross-browser performance.
- Implemented dynamic DOM manipulation for project filtering and integrated a functional, asynchronous contact form with client-side input validation.
- Configured GitHub Pages CI/CD workflow for automated version tracking and zero-downtime deployment.

Student Management System

Technologies: Java, Object-Oriented Programming (OOP), File I/O

- Architected an interactive console-based management application adhering to OOP principles (encapsulation, abstraction, inheritance) to administer comprehensive academic records.
- Engineered full CRUD operations enabling search by student roll number, record modification, and formatted data display.
- Integrated persistent file handling mechanisms ensuring persistent state storage across application executions.

Personal Expense & Budget Tracker

Technologies: Python, CSV Data Persistence, CLI Analytics

- Developed an automated finance tracker enabling users to record daily expenditures, aggregate category-wise spending, and generate real-time budget analytics.
- Implemented modular CSV parsing, robust error handling, and structured data validation for dependable local record preservation.

AWARDS & ACHIEVEMENTS

- **Competitive Problem Solving:** Solved 100+ algorithmic problems across LeetCode and GeeksforGeeks, demonstrating proficiency in arrays, strings, recursion, and linked lists.
- **College Hackathon 2026:** Collaborated within a multidisciplinary team to ideate and prototype a software solution under time constraints, demonstrating rapid problem-solving.
